

**Wolfgang Weiss****DaimlerChrysler**

Wolfgang Weiss is the General Manager of DaimlerChrysler's Fuel Cell Project office located at the California Fuel Cell Partnership in Sacramento. He has been responsible for the testing and servicing of fuel cell vehicle prototypes since the inception of the Partnership. Starting in the Fall of 2004, he will be managing the deployment of pre-production FCV fleet vehicles to customers throughout California.

Mr. Weiss began his automotive career with Daimler Benz in Germany as a Physicist in research and development. From there he joined the DaimlerChrysler fuel cell development team where he worked on the first FCV prototypes designing test benches and measurement procedures for fuel cells, and where he later managed FCV durability tests.

Mr. Weiss holds a Masters Degree in Physics from the University of Stuttgart.
